

RUS Industries Counterfeit Materials Prevention Policy

RUS Industries is committed to preventing the introduction of counterfeit materials into our products. RUS Industries will plan, implement, and control processes, appropriate to the organization and the product, for the prevention of counterfeit or suspect counterfeit materials in products delivered to the customer.

Counterfeit material detection includes awareness of unauthorized copy, imitation, substitution, or modified material presented as genuine.

RUS Industries will:

- inform our suppliers of this policy and hold our suppliers accountable for compliance.
- use material that is manufactured by or for the original manufacturers or authorized distributors.
- implement verification activities that include inspection or periodic testing when a high risk of non conformities including counterfeit material is identified.
- utilize procurement controls including the use of approved sources, original manufacturers, authorized distributors, and monitoring of counterfeit material reporting from external sources.
- maintain appropriate processes to isolate, quarantine, and remove counterfeit material from RUS Industries supply chain, and make appropriate disclosures to the proper authorities.
- investigate reported incidents of suspected counterfeit material.
